PROFILE

Software Engineering student at Fatima Jinnah Women University with hands-on experience in desktop development (C# WinForms), relational databases (SQL Server, Oracle) and modern web development (React, Next.js, Supabase). Team Lead across four full-stack projects in the Zeppelin Labs Web Development Summer Fellowship 2026 (completed), shipping deployed applications under real deadlines. Combines technical delivery with leadership and public speaking ability.

LEADERSHIP & FELLOWSHIP EXPERIENCE

Team Lead — Web Development Summer Fellowship *Jul – Sep 2026*
Zeppelin Labs — Group F1 (Completed)

- Led a six-person cross-functional team through four sequential full-stack projects over a 10-week fellowship, serving as Team Lead on every project.
- **P1 — Local Skill Board:** peer-to-peer skill-exchange directory (Next.js, Supabase, Tailwind CSS), deployed on Vercel.
- **P2 — SpaceSync:** resource & space booking platform (React/Vite/TypeScript, Express.js, Node.js, MongoDB, Redis).
- **P3 — TruckLink:** role-based driver hiring & onboarding portal (React/Next.js, Tailwind, NestJS/MongoDB) with JWT auth and role-based route guards.
- **P4 — CarpoolCampus:** ride-sharing app for commuting students (React, Tailwind CSS, Node.js/Express, PostgreSQL).
- Coordinated frontend–backend integration and handoff, drafted role announcements, and owned frontend testing across signup, login and OTP verification flows.
- Submitted the internship report to FJWU, Department of Software Engineering.

Sponsorship & Logistics Team Lead *2026*
Artificial Intelligence Community of Pakistan (AICP) — FJWU Chapter

- Selected to lead sponsorship acquisition and event logistics for the university chapter.

COMPETITIONS & CHALLENGES

Creator Acquisition Outreach Strategy *2026*
Collabin Growth Challenge (Track D)

- Designed and executed a budgeted creator-acquisition outreach play: channel strategy, incentive structure, objection-handling matrix and phased rollout.

TECHNICAL PROJECTS

- **Missing Persons Database Management System** — role-based access control for admin, law enforcement and public roles.
- **Blood Bank Management System** — donor records, blood inventory and request tracking.
- **Desktop Application (C# WinForms & SQL)** — full CRUD connectivity between a WinForms front-end and SQL Server back-end.
- **Database Design (Oracle)** — relational schema design and advanced querying with complex SQL constraints.
- **Linux Environment & System Operations** — Ubuntu in VirtualBox: configuration, bash commands, system administration.
